Uni-Info - *Fullstack Web Developer*
JANUARY 2024 – August 2024t

- Designed interactive user interfaces
  - Designed and developed the Home Page and Contact Page of the Uni-info Web App, ensuring intuitive and visually appealing user interfaces.
  - Implemented seamless animations using out of the box svelte animation features on the contact page, enhancing user engagements and interactivity.
  - Utilized shadcn-svelte to create dynamic and visually appealing testimonials sections, enhancing the user experience on the platform.
- Implemented I Form Handling
  - Utilized Svelte-Kit features to implement robust form handling, ensuring data accuracy and error-free submissions.
- Implemented User Authentication using Lucia Auth

INDEPENDENT FREELANCE

REACT JS

- I used React-js to modernize client websites built with outdated technologies and severely improved user retention and purchase rates
- I set up an onsite training bootcamp in Nigeria for training web developers in react
- Delivered top down Production Ready Single Page Applications to multiple clients

NEXT JS

- I used Next-js to greatly improve my clients search engine indexing
- Created an email delivery system

SVELTE

- I used svelte to create prototypes and final products for multiple clients

SVELTE-KIT

- I used svelte-kit to increase client's websites' load times
- I used svelte-kit to improve their search engine indexing
